ANUBHAV VERMA

+91 8924069007 | LinkedIn | Github | Portfolio | anubhavv2002@gmail.com

OBJECTIVE

Dedicated full-stack developer with a strong command of MERN technologies, aiming to utilize programming skills and project experience to develop innovative, high-performance web applications.

PROJECTS

Job-junction | A platform to post and search jobs

Live | GitHub

- Developed Job Junction, a job posting and search platform, using MERN stack with secure user authentication and role-based access for employers and job seekers.
- Implemented JWT (JSON Web Tokens) authentication to prevent unauthorized access attempts and enhance overall platform security.
- Implemented modern React practices including Hooks, Router, and Redux to design a responsive and efficient user interface.

Hey | Chat App <u>Live | GitHub</u>

- Created Hey, a real-time chat application, using MERN stack and Socket.io for seamless communication.
- Integrated JWT authentication in Hey to improve scalability and security, while leveraging React Hooks, React Router, and Mongoose for efficient data management.

Summarizer | Article Summarizer with OpenAI GPT Model

Live | GitHub

- Engineered an innovative web app using OpenAI's GPT model to summarize articles, enhancing user productivity.
- Improved user experience with clipboard integration, local storage support, and responsive design, resulting in increased user engagement.
- Architected the article summarization application using Vite, React, Redux Toolkit, and Tailwind CSS.

EDUCATION

Bachelor of Technology- Computer Science & Engineering

Dr. M.C Saxena College of Engineering & Technology, Lucknow

CGPA: 8.2

2020-2024

EXPERIENCE

Web Development Intern | CodeClause

- Developed 3 web applications: Image gallery, a simple music player and a file sharing system.
- Implemented a range of technologies including HTML, CSS, JavaScript, and the MERN Stack to build versatile and efficient web applications.

SKILLS

Programming Languages: JavaScript, Java, TypeScript, Python, C

Web Technologies: HTML-5, CSS 3, React, Node, Express, Tailwind, Bootstrap, SWR Hooks

Database: SQL, MongoDB

Tools: Git, GitHub, VS Code, IntelliJ IDEA, Firebase, Redux Toolkit, Open AI GPT
